

10 Things **YOU CAN DO** To Maintain a Healthy Barnegat Bay

Avoid over use of Fertilizers. Test your soil, apply the right amount, and don't apply before a heavy rainfall.

Use a car wash which recycles water. Or wash your car on a lawn/stones, not in the street.

Don't litter - it travels to the street and ends up in storm drains and the bay.

RECYCLE bottles, cans, newspapers, motor oil. Compost yard waste. Use re-useable grocery bags.

Pesticides are **TOXIC!** Use organic when possible. If you must use them follow directions carefully.

Always pick up **PET WASTE!**

Use a pump-out boat service/facility for your waste.

Safely dispose of household toxic wastes. Call Ocean County Solid Waste Management.

Anglers - don't leave fishing gear behind!

CONSERVE Water!!!

Take short showers, shut the tap off!
